1. Comment: The volume of Austro-Czechoslovak trade handled by Juschwneschtrans was about 37 per cent smaller in February than in January 1953. The cut in imports amounted to 40 per cent, in exports to 29 per cent and in transit shipments to 60 per cent. The center of gravity of Austro-Czechoslovak trade handled by Juschwneschtrans was shifted from Bohemian border stations (Horni Dvoriste, Ceske Velenice) to Moravian stations (Satov, Breclav), especially with imports. In January, about 77 per cent of all trade and 76 per cent of imports were routed via Horni Dvoriste and Ceske Velenice, and 20 per cent of all trade (i.e. import, export, transit) and 20 per cent of imports via Satov and Breclav; in February the share of the Bohemia stations in all trade amounted to about 37 per cent, in imports to about 22 per cent, whereas the share of the Moravian stations rose to 61 per cent of all trade and 76 per cent of imports.

2. Comment: These cutters were possibly earmarked for re-export to the Soviet Zone of Germany. Their destination is, according to the consignment, Prague-Masarykovo nadrazi, but the route indicated on the same document is: Horni Dvoriste - Dolni Zleb (N51/ F 56) - Schöna Grenze (N51/ F 57), the latter being the border station of the Soviet Zone on this railroad line.
